

## 1 TTL Input / 3 RS-422 Output Module

### Features

- One TTL level input
  - BNC connector
- Selectable input impedance
  - 50 ohm
  - 75 ohm
  - High impedance
- Three RS-422 outputs
  - TRIAX connectors
- Pluggable
- Hot Swappable
- Up to 35 Mbps
- Drives the Daisy Chain bus
- Can drive the Global buses
- 3 LED indicators
  - Signal OK
  - No signal
  - Power
- Remote control capable
- Invert Output Polarity

### General Description

The GDP Model 9200-1123 Data Conversion and Distribution Module is one of the functional and hot-swappable modules which can be incorporated into the 9200 Series Chassis. The 9200-1123 Module accepts one TTL level data signal on a BNC connector, and outputs three copies for distribution in RS-422 format on TRIAX connectors. Simultaneously, the input signal drives a daisy chain bus for further selective conversion and distribution by other modules residing in the chassis. With the proper jumper settings, the module also drives either of two global buses on the 9200 chassis backplane for mass distribution to other output modules.

The Model 9200 Data Conversion and Distribution System is a modular product that is scalable and user configured to convert and/or distribute a large selection of data channels to satisfy a wide variety of data signal conversion and distribution functions. The 9200 chassis has 16 single height card slots to house the large selection of 9200 series modules. The 9200 series modules provide the ability to accept and properly terminate a variety of signal types and then convert these signals to other industry standards.

The chassis provides global and daisy chain buses so that signals can be received by one module and then sent to other modules in the chassis to satisfy signal conversion and distribution requirements. This concept provides a cost effective and flexible solution to a wide range of signal conversion and distribution applications such as level conversion, signal inversion, code conversion, time code distribution, fiber optic transport, and optical isolation.

Figure 1 shows a functional block diagram of the Model 9200-1123.

**Specifications**

**ELECTRICAL**

- One TTL level input
  - BNC connector
  - Selectable input impedance: 50ohm, 75 ohm, or high input impedance.
- Three independently driven RS-422 level outputs
  - TRIAX connectors
- Operates up to 35 Mbps
- Hot Swappable module
- Drives Daisy Chain bus
- Can drive Global backplane buses
- 3 LED indicators
  - Green: Signal OK
  - Red: No signal
  - Blue: Power

**MECHANICAL**

- 2.9" wide
- 0.75" high
- 7.1" deep

**ENVIRONMENTAL**

- Operating Temperature
  - 0 degrees C to +55 degrees C
- Operating Relative Humidity
  - 5% to 95% non-condensing
- Non-operating Temperature
  - -40 degrees C to +85 degrees C
- Non-operating Relative Humidity
  - 5% to 95% non-condensing

\* Recognizing that no standard product can meet all the needs of all users, GDP stands ready to provide units tailored to unique applications.
